Environnement

Présentation

Description

In preparation for the Master's thesis, the work in a research laboratory will provide to the students the opportunity to pursue a research project defined with the supervisors while being trained in independent scientific research. Students will be introduced into the state of the art of the respective research area. They will present their results in a research colloquium.

The accompanying seminars will give the opportunity to a broad range of actors from the campuses of Mainz, Dijon and the Forthem alliance to present their field of research and teaching with the aim to facilitate internships and collaboration across the alliance.

Program

- 4 week-internship in a research laboratory
 - research colloquia
 - research seminars
-

Objectifs

Applying advanced skills of the microbiology laboratory in the context of a small scientific project.

Reporting, presenting and discussing scientific results in English.

Following and discussing state-of-the-art international research presentations.

Heures d'enseignement

TD Travaux Dirigés 60h

Pré-requis obligatoires

M1 International Master in Microbiology - ForTheMicrobes

Modalités de contrôle des connaissances

Session 1 ou session unique - Contrôle des connaissances

| Nature de l'enseignement | Modalité | Nature | Durée (min.) | Nombre | Coefficient | Remarques |
|--------------------------|-----------------------|-----------------------|--------------|--------|-------------|-----------|
| | CC (contrôle continu) | CC : Ecrit et/ou Oral | | | 15 | |
